# **VOLKTEK**

# INS-8648M

# Managed 8 x 10/100/1000 RJ45 & 4 x GbE SFP Industrial Switch, DNV Marine Approval

### **Description**

Volktek's INS-8648M Managed Industrial switch is equipped with 8 port 10/100/1000Base-T and 4 Gigabit SFP slots. Engineered with hardened components and enclosed in a rugged case, the switch can operate in wide temperatures from -40°C to 75°C and also has an excellent tolerance capability to high vibration and shock. Under DNV (Det Norske Veritas) certified for Industrial switch, the INS-8648M suits your heavy industrial environments in maritime & offshore applications and yet contains all the standard features of a

Flexible management functions of the switch via Web and SNMP simplifies configuration of switch features such as port settings, security, QoS, VLANs etc. and reduces management burden. In case of any link failure, the INS-8648M's Xpress Ring technology offers a very fast recovery time of less than 10ms to ensure continuous network services. The switch offers hassle-free fiber deployments which makes it an ideal solution for industrial network applications. The INS-8648M provides most rugged solutions for managing your network and is a reliable option for industrial networks.

#### Robust Switch Performance

INS-8648M is built with IP30 aluminum case protection, surge and ESD protection to deliver robust performance and withstand extreme conditions in Industrial environments. The SFP ports support 1000Mbps for high bandwidth transmissions and the SFP DDM feature enables service providers to monitor SFP parameters. In case of any abnormal hardware condition, the switch automatically sends warnings through email and relay output with real-time alarm messages. This assists the system administrators to immediately react to emergency events and diagnose the faults more efficiently for smoother network operations.

#### Port-BASEd VLAN, IEEE 802.1Q VLAN, GARP and GVRP to ease network planning

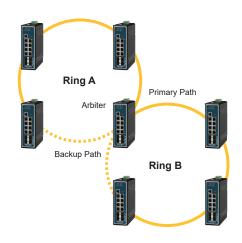

Planning, designing and managing complex networks is now simplified with INS-8648M. The switch supports VLANs which segment large networks into smaller parts and organize them into separate broadcast domains. This helps the administrators to control the traffic patterns, limit broadcast traffic and reduce broadcast storms. As the network expands, to provide control of increased VLANs, the switch offers GVRP feature, an application protocol of GARP, which registers and deregisters devices and its ports depending on their availability. This feature prevents unnecessary network traffic transmitted by unregistered users and simplifies the network design irrespective of its size.

### **Network Redundancy**

- · Volktek's industrial switches redundant ring architecture enhances network reliability and make them ideal for deploying secure automation network systems in tough outdoor industrial environments, such as ITS, maritime, mining, and manufacturing systems.
- New generation of Volktek Xpress Ring delivers a various choice of ring topologies, including Xpress Ring, Dual Xpress Ring, Dual Homing, in rapid recovery time (<20ms @ 250 switches).
- · G.8032v2, Ethernet Ring Protection Switching (ERPS) protocol, provides protection for Ethernet traffic in a multiple ring topology with fast recovery time (less than 50ms).

### Redundant Power system

Mission-critical industrial applications need to operate without any interruptions because even a minimum network downtime can hugely impact the overall output. Providing continuous power and as well as data to such applications is now made easy with INS-8648MM's redundant power system. The switch is designed with standard industrial terminal block for redundant power. In case the primary power supply fails, the secondary power will enable the switch to provide continuous service.

### Note:

- \* The SFP communication distance upon the request.
- \* Industrial SFP with wide operating temperature from -40°C~85°C (-40°F~185°F) is available
- \* The highest degree of temperature operation certified by DNV is (Class D) -25°C-70°C (-13°F~158°F), and the nominal voltage of 24VDC for DNV type approval is specified.

  \* The highest degree of temperature operation certified by UL is -40°C~70°C (-40°F~158°F).
- \* Specifications subject to change without notice.
