VOLKTEK

Atthis 6500-24GS4XS

Managed 20 x FX/GbE SFP & 4 x FE/GbE Combo RJ45/SFP & 4 x 1G/10G SFP+ Switch

Description

Atthis 6500-24GS4XS series is a Managed L2+ Aggregation switch designed to meet the requirements of ISPs (internet service providers), MSOs (multiple system operators), and enterprise class networks. Atthis 6500-24GS4XS is equipped with 20 multi-rate (100/1000M) SFP slots plus four gigabit combo ports. Especially, this model supports 4-ports 1G/10G fiber uplink slots for high bandwidth demand.

It is designed to deliver a flexible and reliable network for management and monitoring which can increase the efficiency and performance. The switch is equipped with powerful and easy-to-use management functions to deliver efficiently controlled services on a highly secured network.

Features Highlight

10G Uplink Interface

4 slots SFP+ for 1G/10G fiber uplinks can deliver wire-speed throughput with low latency for data-intensive application. 10G networking is less expensive than highly specialized Fiber Channel (SAN) and do not needs a specialized skill set for installation and management. To compare with aggregating multiple Gigabit Ethernet links, it can help reducing the cost and increasing manageability efficiently.

Multicast Video Service Support

IGMP (Internet Group Management Protocol) snooping for regulation of multicast traffic and MVR (Multicast VLAN Registration) for communication with hosts residing on different VLANs in a Layer 2 network.

Redundant Ring for Fast Network Recovery

Even a few seconds of missed communications due to link failures can cause inconvenience, and recovery can become critical. Volktek's proprietary Xpress Ring in Atthis 6500-24GS4XS rapidly reacts to such link failures and recovers in less than 50ms, a much faster fail-over time to support nonstop transmissions. This is critical for networks handling heavy video and data traffic. In addition, ERPS, Dual Homing, LACP and RSTP/MSTP provide a highly reliable network with redundancy connections whenever required and guarantee continuous network uptime.

Efficient Traffic Prioritization

Network applications need different levels of services delivered to them reliably without any transmission delays and interruptions. Atthis 6500-24GS4XS has comprehensive QoS mechanisms that assign priority to applications and send only specific dedicated traffic to them. In addition, bandwidth management functions of the switch allocate greater bandwidth for mission-critical communications. With increased control, administrators can prevent unpredictable errors and utilize the bandwidth more effectively.

Enhanced Control and Security

Atthis 6500-24GS4XS implements several defense mechanisms such as ACL, DHCP snooping, ARP, IEEE 802.1X and Port Security to deliver robust network security and enables service providers to offer more stable services on a more secure network.

Efficient Network Monitoring and Management

It is designed with SNMP (Simple Network Management Protocol) v1/v2c/v3 and RMON (Remote Monitoring) for real-time traffic analysis, flexible network management and monitoring options which increased efficiency and performance. Whether managing from an 'in-band' SNMP management station or Internet web browser, or 'out-of-band' on console port, Atthis 6500-24GS4XS makes network monitoring and troubleshooting easy. SNMP is used for collecting information from, and configuring, network devices on an Internet Protocol (IP) network. Volktek Managed switch provides SNMP agent that works with third-party SNMP management software to monitor the device status.

Specifications

Unparalleled Network Performance

Storm Control and traffic monitoring to limit unwanted incoming traffic based on defined parameters for prevention of LAN disruption.

Withe the Recovery Timer for Loop Detection; Instead of being re-opened manually, a configurable timer is provided to automatically recover a port blocked by the loop detection function.

Auto-Provisioning

The switch can be configured and connected to a pre-designated Volktek support server for automatic firmware upgrade. Without the need of a field engineer's intervention, this real-time automatic provisioning helps in reduce labor costs, especially in upgrading multiple devices in a large field deployment.

Applications

Specifications

Standards	
IEEE 802.3	10BASE-T
IEEE 802.3u	100BASE-TX
IEEE 802.3ab	1000BASE-T
IEEE 802.3u	100BASE-FX
IEEE 802.3z	1000BASE-SX/LX
IEEE 802.3ae	10GBASE-SR/LR/ER
IEEE 802.3	Nway Auto-negotiation
IEEE 802.3x	Flow Control

Power	
I 4 \ / - I t	AC: 100~240V, 50~60Hz
Input Voltage	DC: 48V
Power Consumption	6500-24GS4XS-A-C: 30W
	6500-24GS4XS-AB-C: 50W
Mechanical and Environm	ent
Housing	Metal Case
Mounting	Rack Mount
Cooling Fan	2
Operating Temperature	0°C~60°C (32°F~140°F)
Storage Temperature	-20°C~70°C (-4°F~158°F)
Operating Humidity	5 to 95% RH (non-condensing)
Storage Humidity	5 to 95% RH (non-condensing)
Weight	3890 g (8.77 lbs)
Dimension (WxHxD)	440 x 44 x 284 mm (17.3 x 1.73 x 11.21 in)
Certifications (Processing)	
Electromagnetic Compatibility	FCC Class A EN 62368-1 EN 55032 Class A EN 55035 EN 61000-3-2/3
Freefall	IEC 60068-2-31
Ordering Information	
6500-24GS4XS-A-C	Managed 20 x FX/GbE SFP & 4 x FE/GbE Combo RJ45/SFP & 4 x 1G/10G SFP+ Switch, with AC Power Input
6500-24GS4XS-AB-C	Managed 20 x FX/GbE SFP & 4 x FE/GbE Combo RJ45/SFP & 4 x 1G/10G SFP+ Switch, with AC Power Input, Battery Charge Function Included
6500-24GS4XS-D-C	Managed 20 x FX/GbE SFP & 4 x FE/GbE Combo RJ45/SFP & 4 x 1G/10G SFP+ Switch, with DC Power Input
Optional Accessories	
SDR-120-48	DIN-Rail, 120W, 48VDC, Industrial Power Supply with PFC Function
GBM-123TS	1000BASE-LX, Bi-Di SFP TX:1310/RX:1550, Single Mode, 10Km
GBM-123RS	
	1000BASE-LX, Bi-Di SFP TX:1550/RX:1310, Single Mode, 10Km
GBM-132TS	Single Mode, 10Km 100BASE-FX, Bi-Di SFP TX:1310/RX:1550, Single mode, 20Km
	Single Mode, 10Km 100BASE-FX, Bi-Di SFP TX:1310/RX:1550,
GBM-132TS	Single Mode, 10Km 100BASE-FX, Bi-Di SFP TX:1310/RX:1550, Single mode, 20Km 100BASE-FX, Bi-Di SFP TX:1550/RX:1310,
GBM-132TS GBM-132RS	Single Mode, 10Km 100BASE-FX, Bi-Di SFP TX:1310/RX:1550, Single mode, 20Km 100BASE-FX, Bi-Di SFP TX:1550/RX:1310, Single mode, 20Km

Note

- * The SFP communication distance upon the request.
- * Industrial SFP with wide operating temperature from -40°C~85°C is available upon request.
- * Specifications subject to change without notice.
